Diagram showing the calculation of the sum of the first 4 natural numbers using the formula:

$$N = 4$$

$$1 + 2 + 3 + 4 = 10$$

$$\frac{N(N+1)}{2} = \frac{4 \times 5}{2} = 10$$

Loop → Do something repeatedly

HOME WORK

Q1 → Take input a N, print the value of N!

$$N = 5$$

$$5! = 1 \times 2 \times 3 \times 4 \times 5 = 120$$

Q2 → Take input N, followed by N integers you have print theirs sum & also the smallest No

Q3 → Take input 2 no's, swap their values

$$A = 10$$

$$B = 20$$

$$B = 10$$

$$A = 20$$
